

Hercules lashing

Hercules lashing rope is manufactured from extruded polypropylene tape. During the stranding operation each strand is armed with soft steel wire inside. The purpose of this process is to improve the stiffness and knotting of the rope which makes it excellent for lashing and securing operations on-board ships.

- Very strong
- Very economical
- Easy to handle
- Flexible

Hercules lashing natural white

Hercules lashing multicolour

Construction

3-strand twisted

4-strand on request

Standard colour

Natural white or multicolour
Other colours available on request

Typical applications

Lashing and securing of goods on-board ships

Length measured under reference tension according to EN ISO 9554

Hercules lashing

Diam. Ø	Mass	Min. breaking load	
mm	kg/100m	T	kN
8	4	0,96	9,41
10	5	1,45	14,2
12	6	2,03	19,9

Load VS Extension
